The satellite will be controlled by two ground stations, which will be used for primary and back-up site operations and control centres. Thales Alenia Space will provide tools for the ground segment for the mission planning and space operations monitoring. It will also build two ground facility buildings, which will house satellite control and network operations centre.

Built on the new-generation Spacebus 4000B2 platform from Thales Alenia Space, Bangabandhu 1 is fitted with 26 ku-band and 14 C-band transponders. Its coverage area includes Bangladesh and surrounding regions. Positioned at 119.1° East, the system will provide Ku-band coverage for Bangladesh and its territorial waters in the Bay of Bengal, India, Nepal, Bhutan, Sri Lanka, the Philippines and Indonesia.
