

Launch Sequence:

00:00:00 Falcon 9 liftoff

00:01:13 Max Q (moment of peak mechanical stress on the rocket)

00:02:32 1st stage main engine cutoff (MECO)

00:02:35 1st and 2nd stages separate

00:02:42 2nd stage engine starts

00:03:35 Fairing deployment

00:06:14 1st stage entry burn begins

00:08:11 2nd stage engine cutoff (SECO-1)

00:08:38 1st stage landing

00:27:21 2nd stage engine restarts

00:28:09 2nd stage engine cutoff (SECO-2)

00:33:10 JCSAT-18/Kacific1 deployment

SpaceX is launching a Falcon 9 rocket with a geostationary satellite on board. It is a high-throughput communication satellite jointly owned by Kacific Broadband Satellites Pte Ltd, Singapore, JSAT Corporation, Japan, to be operated in Ku-Band for mobile telephone, data and internet users throughout the Asia-Pacific region. The satellite is based on the 702MP bus built by Boeing with an expected lifetime of 15 years of operation.

The 1st stage of the Falcon 9 booster rocket is expected to land on a barge in the Atlantic Ocean over 300 miles off of Cape Canaveral FL. The landing will not be visible to viewers at the launch viewing sites.

You don't need to be a space "professional" to utilize space satellites. Ham radio operators have had their own legal and authorized space satellites for decades, and anyone willing to put in some time and effort to get an Amateur Radio License can "Work the birds", and chat with folks over orbiting satellites.

To learn more about becoming a ham, visit ARRL.Org/newham
