308 Pine St

The STP-3 mission consists of the STPSat-6 satellite that hosts the National Nuclear Security Administration's Space and Atmospheric Burst Reporting System-3 (SABRS-3) package and NASA's Laser Communications Relay Demonstration (LCRD) experiment. The launch also includes a propulsive secondary payload adapter carrying additional small science and technology missions.

A United Launch Alliance (ULA) Atlas V 551 rocket will launch the Space Test Program 3 (STP-3) mission for the U.S. Space Force. 551 refers to the 5 meter diameter payload fairing, the 5 solid rocket boosters to lift the rocket into space, and the single engine on the Centaur upper stage. Liftoff will occur from Space Launch Complex-41 at the Cape Canaveral Space Station, Florida.

STP-3
