

as to provide competitively-priced, low latency service to urban areas. Moreover, SpaceX has indicated that the positive cash flow from selling satellite internet services would be necessary to fund SpaceX plans for Mars.

The launch will be from the Cape Canaveral Air Force Station's Space Launch Complex 40. The first stage of the Falcon 9 booster is expected to land on a barge in the Atlantic Ocean off Charleston SC. The landing will be too far to see from launch viewing areas, though upper atmosphere course correction burns might be visible about 7 minutes after launch.

SpaceX has articulated the explicit goal of providing broadband internet connectivity to underserved areas of the Earth, as well as tons.

er internet connections without multiple 'hops' via ground stations. The constellation. Inter-satellite laser comm links will allow fast-include some inter-satellite communications among satellites in so this flight is designated Starlink-8. Many of these satellites will orbit. The first launch of 60 satellites was considered Starlink-0, Today's launch will put the ninth 'batch' of Starlink satellites into Space Exploration Technologies Corp, known around the world as SpaceX, is launching its next 'batch' of Internet Broadband satellites, as well as carrying two satellites as 'paying customers'. Planet.com makes it's own Earth imaging satellites, orbits them, and sells the resulting images to provide views of daily changes of the Earth in the users Area Of Interest. The company is owned by Planet Labs of San Francisco CA.
