Multiple satellites launched on a Falcon 9

2020-10-18 8:27 amEDT

Space Exploration Technologies Corp, known around the world as SpaceX, is launching its next 'batch' of Internet Broadband satellites, as well as carrying two satellites as 'paying customers'. Today's launch will put the fourteenth 'batch' of Starlink satellites into orbit. The first launch of 60 satellites was considered Starlink-0, so this flight is designated Starlink-13. Many of these satellites will include some inter-satellite communications links will allow faster internet connections without multiple 'hops' via ground stations. SpaceX has articulated the explicit goal of providing broadband internet connectivity to underserved areas of the Earth, as well as to provide competitively-priced, low latency service to urban areas. Moreover, SpaceX has indicated that the positive cash flow from selling satellite internet services would be necessary to fund SpaceX plans for Mars.

Complex 39A. The first stage of the Falcon 9 booster is expected to land on a barge in the Atlantic Ocean off Charleston SC. The landing will be too far to see from launch viewing areas, though upper atmosphere course correction burns might be visible about 7 minutes after launch.

The launch will be from the Kennedy Space Center's Launch
