

SpaceX has articulated the explicit goal of providing broadband internet connectivity to underserved areas of the Earth, as well as connections without multiple 'hops' via ground stations. The constellation. Inter-satellite links will allow faster internet the inter-satellite communications planned for follow-on sats in orbit. These are considered 'test satellites', as they do not have launch will put the first 'batch' of 60 operational satellites into While two test satellites were placed in orbit last year, today's band sats at 340 km (210 mi).

- and Ka-band spectrum sats at 1,150 km (710 mi) and ~7500 V-kilometer (340 mi)-altitude shell, subsequently placing ~2800 Ku the mid-2020s: initially placing approximately 1600 in a 550-plans to deploy nearly 12,000 satellites in three orbital shells by hopes will pay for it's further explorations of Mars. SpaceX has communication satellites to provide internet services that it as SpaceX, is launching it's own constellation of broadband data Space Exploration Technologies Corp, known around the world

as to provide competitively-priced service to urban areas. Moreover, SpaceX has indicated that the positive cash flow from selling satellite internet services would be necessary to fund SpaceX plans for Mars. The first stage of the Falcon 9 booster is expected to return to Landing Zone 1 at the Cape Canaveral Air Force Station.
